Retail & commercial

Our extensive experience in the complex and challenging industry of retail and commercial development will make a difference in delivering high-quality projects.

- Whether the project is large or small, factors such as design, planning regulations, environment planning and budget need to be managed and controlled
- Waldeck has a strong reputation for delivering comprehensive design engineering services to the retail and commercial sector nationally
- We have worked for developers, landlords and tenants and so understand the important issues in achieving a pragmatic, cost-effective and timeless solution

- We recognise that initial cost-effective construction needs to take into account future flexibility, life-cycle costs, needs of funds and investors and ongoing maintenance
- In addition, Waldeck provides party wall surveying, which can often be needed in city or town centre conversion projects
- Our experienced and energetic design team uses sophisticated engineering and modelling tools to facilitate the decision-making process at the early stages of projects

Our extensive track record in your industry has seen us:

- involved in programmes to extend and build new multi-purpose facilities ranging from individual outlets to major city centre malls
- included in projects incorporating offices, hotels, retail stores, shopping centre, restaurants, listed buildings, change of use and mixed-use developments

- work with major retail and hotel chains together with nationwide commercial office developers and innovation centres
- develop a strong commitment to sustainability
- become one of only a handful of consulting civil and structural engineers who are accredited on The Green Register of Construction Professionals
- create a team which delivers

We offer the following services with a high level of expertise:

- Structural engineering
- Civil engineering
- Sustainable design
- Pre-planning and pre-acquisition
- Flood risk assessments
- Transport planning
- Structural surveys
- Energy assessments
- Party Wall Act 1996 issues
- Precast crosswall systems
