Mechanical & Electrical design

Waldeck understands the importance of co-ordinated, combined engineering solutions and our Mechanical and Electrical engineering services division provide design services with innovation and creative engineering to deliver simple effective solutions.

The commercial approach of Waldeck to engineering design along with our wealth of knowledge and understanding of a large range of engineering projects from planning, design, management through to delivery means we can fully appreciate what is required to provide a cost effective innovative design solution.

Waldeck has significant experience in all sectors of the building services environment and through its positive collaboration with clients and design teams we meet the aspirations, needs and requirements of the projects.

Core to our Mechanical and Electrical services we offer:-

- Pre- planning advice and expertise
- Infrastructure Planning
- Surveys and condition reports
- Building Regulation and Sustainable planning reports
- M&E Design services
- Life Cycle costing and planning
- Tender analysis
- M&E project management
- Monitoring of onsite commissioning and workmanship
